<sup>\*</sup>This file describes version v0.1, last revised 2020/04/16.

## 1 Purpose of this package

This package is made for the HSR Studenten organization to provide an easy to use interface to give a more consistent look and feel for the works produced by its the members. A secondary objective of this package is to eliminate the *many* dispersed duplicate .tex files that fill the repositories of the HSR-Stud org.

## 2 Package Options

**dontrenew** Do not renew existing LATEX commands and environments. This is useful when the package is loaded on a document that is already partiall written.

**arrowvec** Tells the package to use a vector notation with a small arrow over the variables, as it were handwritten.

textvecdiff Disables the "Nabla" or "Del" notation for vector derivatives. Instead the symbols  $\nabla, \nabla \cdot, \nabla \times, \nabla^2$  are be replaced with grad, div, curl and div grad.

# 3 Summary notation

# 4 Default Theming

### 4.1 Links with hyperref

```
Colors from [?] see

https://intranet.hsr.ch

1 Colors from
2 \cite{bib:hsrcolors} see \\
3 \url{https://intranet.hsr.ch}
```

#### 4.2 Source Code with listings

```
int main(int argc, char *argv[], char *envp[]) {
   std::cout << "hello world" << std::endl;
}

\begin{lstlisting}[language=C++]
int main(int argc, char *argv[], char *envp[]) {
   std::cout << "hello world" << std::endl;
}
\end{lstlisting}
</pre>
```

### 5 Mathematics

#### 5.1 Vectors

\vec, \v, \vc Vectors notation. If the option arrowvec described in §2 is enabled, the notation with a small arrow over the varible will be used  $\vec{x}$ , otherwise the vector is bold x. Takes one option  $\{\langle letter \rangle\}$ . \v is renamed to \vaccent and \vec to \oldvec.

```
\mathbf{F} = m\mathbf{a} 1 \[ \vec{F} = m\vec{a} \]
```

\uvec, \uv Unit vector notation. Takes  $\{\langle letter \rangle\}$ . It is implemented in terms of \vec, which means that the style is inherited.

$$\hat{\mathbf{x}} = \mathbf{x}/x$$
 1 \[ \uvec{x} = \vec{x}/x \]

#### 5.1.1 Products

\dotp Dot product between vectors.

$$\mathbf{u}\cdot\mathbf{v}$$
 1 \[ \vec{u}\dotp\vec{v} \]

\crossp, \cross Cross product between vectors.

$$\mathbf{u} imes \mathbf{v}$$
 1 \[ \vec{u}\cross\vec{v} \]

#### 5.2 Matrices and Tensors

\mtx Matrix notation. Takes  $\{\langle letter \rangle\}$ .

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 4 & 1 & 0 \\ 5 & & \text{end{pmatrix}} \end{pmatrix}$$

\ten Tensor notation. Takes  $\{\langle letter \rangle\}$ .

$$\mathbf{T^{(n)}} = \hat{\mathbf{n}} \cdot \underline{\boldsymbol{\sigma}}$$

$$1 \setminus [$$

$$2 \quad \text{vec}\{T\}^{(\text{vec}\{n\})} =$$

$$3 \quad \text{uvec}\{n\} \setminus \{\text{sigma}\}$$

$$4 \setminus ]$$

#### 5.3 Equalities

\heq L'Hôpital limit equality symbol.

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

#### 5.4 Derivatives

#### 5.4.1 Differentials

\dd The differential element. It needs a  $\{\langle var \rangle\}$  and has the optional argument  $[\langle order \rangle]$ .

$$\mathrm{d}x = \mathrm{d}^4x$$
 1 \[ \dd{x} \qquad \dd[4]{x} \]

\di This is the same as \dd but with a small space in front, it is intended to be used in integrals for a nicer typesetting.

$$I = \int \mathbf{J} \cdot d\mathbf{s}$$

$$= \iint \mathbf{J} \cdot \hat{\mathbf{n}} \, dx \, dy$$

$$1 \text{ \begin{align*}} \\ 2 & I & & & | \text{int } \text{vec{J}} \setminus dotp \setminus dd} \\ 3 & & & & | \text{iint } \text{vec{J}} \setminus dotp \setminus dd} \\ & & & & \text{uvec{n}} \setminus di\{x\} \setminus di\{y\} \setminus dd\{align*\}$$

#### 5.4.2 Classical

\deriv The derivative has arguments  $\{\langle function \rangle\}$ ,  $\{\langle var \rangle\}$  and the optional argument  $[\langle order \rangle]$ .

\pderiv The partial derivative has arguments  $\{\langle function \rangle\}$ ,  $\{\langle var \rangle\}$  and the optional argument  $[\langle order \rangle]$ .

#### **5.4.3** Vector

\grad The gradient operator.

$$abla f$$
 1 \[ \grad f \]

\div The divergence operator, \div is renamed to \divsymb.

$$abla \cdot f$$
 1 \[ \div f \]

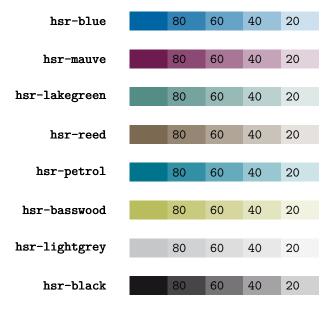

\curl The curl operator.

$$abla imes f$$
 1 \[ \curl f \]

\laplace The laplace operator.

$$abla^2 f$$
 1 \[ \laplace f \]
