1 Purpose of this package

This package is made for the HSR Studenten organization to provide a consistent style and source syntax across documents.

^{*}This file describes version v0.1, last revised 2020/04/16.

2 Dependencies

The following packages are automatically loaded and do not need to be set up.

3 Package Options

arrowvec Tells the package to use a vector notation with a small arrow over the variables, as it were handwritten.

textvecdiff Disables the "Nabla" or "Del" notation for vector derivatives. Instead the symbols $\nabla, \nabla \cdot, \nabla \times, \nabla^2$ are be replaced with grad, div, curl and div grad.

4 Default Theming

4.1 Links with hyperref

```
Colors from [1] see

https://intranet.hsr.ch

1 Colors from
2 \cite{bib:hsrcolors} see \\
3 \url{https://intranet.hsr.ch}
```

4.2 Source Code with listings

```
1 int main(int argc, char *argv[], char *envp[]) {
2    std::cout << "hello world" << std::endl;
3 }

1 \begin{lstlisting}[language=C++]
2 int main(int argc, char *argv[], char *envp[]) {
3    std::cout << "hello world" << std::endl;
4 }
5 \end{lstlisting}</pre>
```

5 Mathematics

5.1 Vectors

\vec, \v Vectors notation. If the option arrowvec described in §3 is enabled, the notation with a small arrow over the varible will be used \vec{x} , otherwise the vector is bold \vec{x} . Takes one option $\{\langle letter \rangle\}$.

\uvec, \uv Unit vector notation. Takes $\{\langle letter \rangle\}$. It is implemented in terms of \vec, which means that the style is inherited.

```
\hat{\mathbf{x}} = \mathbf{x}/x 1 \[ \uvec{x} = \vec{x}/x \]
```

5.1.1 Products

\dotp Dot product between vectors.

 $\mathbf{u} \cdot \mathbf{v}$ 1 \[\vec{u}\dotp\vec{v} \]

\crossp, \cross Product between vectors.

 $\mathbf{u} imes \mathbf{v}$ 1 \[\vec{u}\cross\vec{v} \]

5.2 Matrices and Tensors

\mtx Matrix notation. Takes $\{\langle letter \rangle\}$.

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$$

$$J = \begin{pmatrix} 0 & 1 \\ 4 & 1 & 0 \\ 5 & & \text{end{pmatrix}} \end{pmatrix}$$

\ten Tensor notation. Takes $\{\langle letter \rangle\}$.

$$\mathbf{T^{(n)}} = \hat{\mathbf{n}} \cdot \underline{\boldsymbol{\sigma}}$$

$$\begin{array}{c} 1 \mid [\\ 2 \mid \text{vec}\{T\}^{(\text{vec}\{n\})}\} = \\ 3 \mid \text{vec}\{n\} \mid \text{dotp} \mid \text{sigma}\} \\ 4 \mid] \end{array}$$

5.3 Equalities

\heq L'Hôpital limit equality symbol.

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathbf{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0$$

5.4 Derivatives

5.4.1 Differentials

\dd The differential element. It needs a $\{\langle var \rangle\}$ and has the optional argument $[\langle order \rangle]$.

$$\mathrm{d}x = \mathrm{d}^4x$$
 1 \[\dd{x} \qquad \dd[4]{x} \]

\di This is the same as \dd but with a small space in front, it is intended to be used in integrals for a nicer typesetting.

$$I = \int \mathbf{J} \cdot d\mathbf{s}$$

$$= \iint \mathbf{J} \cdot \hat{\mathbf{n}} \, dx \, dy$$

$$1 \text{ \begin{align*}} \\ 2 & I & & & | \text{int } \text{vec{J}} \setminus dotp \setminus dd} \\ & & & & & | \text{vec{s}} \setminus | \\ 3 & & & & | \text{iint } \text{vec{J}} \setminus dotp \setminus | \\ & & & & | \text{uvec{n}} \setminus di\{x\} \setminus di\{y\} \setminus dd\{x\} \setminus dd\{x\} \setminus dd\{y\} \setminus dd\{x\} \setminus dd\{y\} \setminus dd\{x\} \setminus dd\{y\} \setminus dd\{$$

5.4.2 Classical

\deriv The derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

\pderiv The partial derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

 $\begin{array}{ccc} \frac{\partial y}{\partial x} & \frac{\partial^3 y}{\partial x^3} & \begin{array}{cccc} & & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ & & & \\ \end{array} \hspace{0.2cm} \begin{array}{cccc} & & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccccc} & & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{ccccc} & & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \begin{array}{ccccc} & & & \\ \end{array} \hspace{0.2cm} \begin{array}{ccccc} & & & \\ \end{array} \hspace{0.2cm} \hspace{0.2cm} \end{array} \hspace{0.2cm} \hspace{0.2cm} \hspace{0.2cm} \hspace{0.2cm} \hspace{0.2cm} \hspace{0.2cm} \hspace{$

5.4.3 Vector

\grad The gradient operator.

abla f 1 \[\grad f \]

 $\verb|\div| The divergence operator|, \verb|\div| is renamed to \verb|\divsymb|.$

 $abla \cdot f$ 1 \[\div f \]

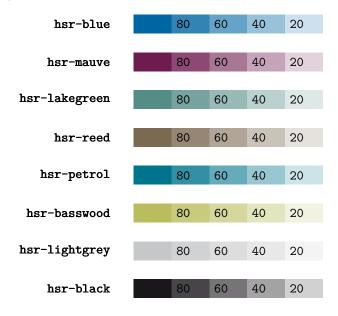

\curl The curl operator.

abla imes f 1 \[\curl f \]

\laplace The laplace operator.

 $abla^2 f$ 1 \[\laplace f \]
