1 Introduction

This package is made for the HSR Studenten organization to provide a consistent style and source syntax across documents.

2 Package Options

arrowvec Tells the package to use a vector notation with a small arrow over the variables, as it were handwritten.

textvecdiff Disables the "Nabla" or "Del" notation for vector derivatives. Instead the symbols $\nabla, \nabla \cdot, \nabla \times, \nabla^2$ are be replaced with grad, div, curl and div grad.

^{*}This file describes version v0.1, last revised 2020/04/16.

Mathematics

3.1 Vectors

Vectors notation. If the option arrowvec described in §2 is enabled, the notation with a small arrow over the varible will be used, otherwise the vector is bold. Takes one option $\{\langle letter \rangle\}$.

```
\vec{F} = m\vec{a}
                                  \sqrt{F} = m\sqrt{a}
       \mathbf{F} = m\mathbf{a}
8 \newcommand{\hsrvecbold}[1]{\mathbf{\boldsymbol{#1}}}
9 \newcommand{\hsrvecarrow}[1]{\vv{\mathrm{#1}}} % from esvect
10 \newcommand{\@hsrvecf}[1]{\hsrvecbold{#1}}
11 \if@arrowvec
       \renewcommand{\@hsrvecf}[1]{\hsrvecarrow{#1}}
12
13 \fi
14
15 % save previous command
16 \newcommand{\vaccent}{\v}
17 \newcommand{\oldvec}{\vec}
18 % redefine
19 \renewcommand{\v}[1]{\@hsrvecf{#1}}
20 \renewcommand{\vec}[1]{\@hsrvecf{#1}}
```

\uvec, \uv Unit vector notation. Takes $\{\langle letter \rangle\}$. It is implemented in terms of \vec, which means that the style is inherited.

$$\hat{\mathbf{x}} = \mathbf{x}/x \qquad \hat{\mathbf{x}} = \text{vec}\{\mathbf{x}\}/\mathbf{x}$$
 21 \newcommand{\hsruvecbold}[1] {\vec{\hat{#1}}}
22 \newcommand{\hsruvecarrow}[1] {\hat{\mathrm{#1}}}
23 \newcommand{\@hsruvecf}[1] {\hsruvecbold{#1}}
24 \if@arrowvec
25 \renewcommand{\@hsruvecf}[1] {\hsruvecarrow{#1}}
26 \fi
27
28 \newcommand{\uv}[1] {\@hsruvecf{#1}}
29 \newcommand{\uvec}[1] {\@hsruvecf{#1}}

\dotp Dot product between vectors.

\vec{u}\dotp\vec{v} 11 · V

3.1.1 Products

30 \newcommand{\dotp}{\boldsymbol\cdot}

\crossp, \cross Cross product between vectors.

3.2

$$\mathbf{u}\times\mathbf{v} \qquad \text{$$\operatorname{u}\sim \mathbb{v}$}$$
 31 \newcommand{\crossp}{\boldsymbol\times}

32 \newcommand{\cross}{\boldsymbol\times}

Matrices and Tensors

\mtx Matrix notation. Takes $\{\langle letter \rangle\}$.

$$\mathbf{J} = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix} \qquad \begin{array}{c} \mathsf{mtx}\{\mathbf{J}\} = \mathsf{begin}\{\mathsf{pmarix}\} \\ & \mathsf{0} \& 1 & \mathsf{1} \\ & 1 \& \mathsf{0} \\ & \mathsf{nd}\{\mathsf{pmatrix}\} \end{array}$$

33 $\mbox{newcommand{\mtx}[1]{\mathrm{#1}}}$

\ten Tensor notation. Takes $\{\langle letter \rangle\}$.

 $34 \mbox{ } {1}{\mbox{ } \mbox{ } \mb$

3.3 Equalities

\heq L'Hôpital limit equality symbol.

$$\lim_{x\to\infty}\frac{x}{x^2-1}\stackrel{\hat{\mathrm{H}}}{=}\lim_{x\to\infty}\frac{1}{2x}=0 \qquad \begin{array}{l} \lim_{x\to\infty}\{x\to\infty\} \\ \text{lim}_{x\to\infty}(x\to\infty) \\ \text{lim}_{x\to\infty}($$

 $35 \end{\hat{H}}{\left(\frac{H}}{=}\right)$

3.4 Derivatives

3.4.1 Differentials

\dd The differential element. It needs a $\{\langle var \rangle\}$ and has the optional argument $[\langle order \rangle]$.

36 \newcommand{\dd}[2][]{\mathrm{d}^{#1} #2}

\di This is the same as \dd but with a small space in front, it is intended to be used in integrals for a nicer typesetting.

$$I = \int \mathbf{J} \cdot \mathrm{d}\mathbf{s}$$
 % no spacing needed (because of dotp)
$$I = \inf \{ \mathbf{J} \cdot \hat{\mathbf{n}} \, \mathrm{d}x \, \mathrm{d}y$$
 % needs spacing between dx and dy
$$= \inf \{ \mathbf{J} \cdot \hat{\mathbf{n}} \, \mathrm{d}x \, \mathrm{d}y$$
 = \iint\vec{J}\\dotp\uvec{n}\\di{x}\\di{y}

37 \newcommand{\di}[2][]{\,\dd[#1]{#2}}

3.4.2 Classical

\deriv The derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

38 \newcommand{\deriv}[3][]{\frac{\dd[#1]{#2}}{\dd[]{#3^{#1}}}}

\pderiv The partial derivative has arguments $\{\langle function \rangle\}$, $\{\langle var \rangle\}$ and the optional argument $[\langle order \rangle]$.

$$rac{\partial y}{\partial x} \qquad rac{\partial^2 y}{\partial x^2} \qquad \text{ \ \ } \text{ \$$

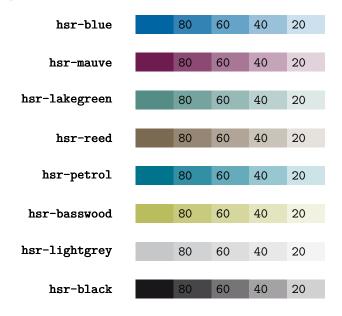

39 \newcommand{\pderiv}[3][]{\frac{\partial^{#1} #2}{\partial #3^{#1}}}

3.4.3 Vector

\grad The gradient operator.

```
\grad f
                             \nabla f
            40 \if@textvecdiff
                   \newcommand{\grad}{\text{grad }}
                   \newcommand{\grad}{\nabla}%
            43
            44 \fi
    \div The divergence operator, \div is renamed to \divsymb.
                                                \div f
                            \nabla \cdot f
            45 \left| \text{divsymb=} \right|
            46 \if@textvecdiff
                  \renewcommand{\div}{\text{div}}
            48 \else
            49
                   \renewcommand{\div}{\nabla\cdot}
            50 \fi
   \curl The curl operator.
                            \nabla \times f
                                                \curl f
            51 \if@textvecdiff
                   \newcommand{\curl}{\text{curl }}
                   \newcommand{\curl}{\nabla\times}
            55 \fi
\laplace The laplace operator.
                             \nabla^2 f
                                                \laplace f
            56 \if@textvecdiff
                   \newcommand{\laplace}{\text{div grad}}
            58 \ensuremath{\setminus} \texttt{else}
                   \label{laplace} $$\operatorname{\nabla^2}$
            59
            60 \fi
```
